# WEB DEVELOPMENT

GREETINGS

Gearheart is a distributed web development team. We create custom web applications and mobile APIs using cutting edge technologies, like Django and Angular.js. We bring new ideas to project, make decisions quickly, provide great quality and planning.
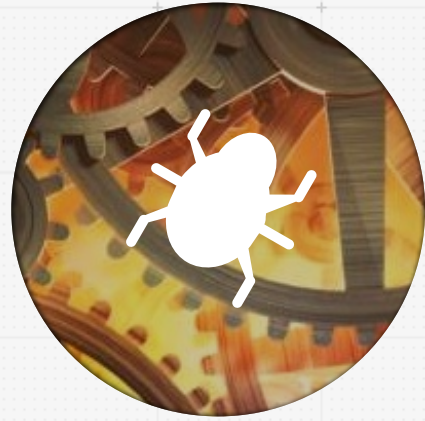

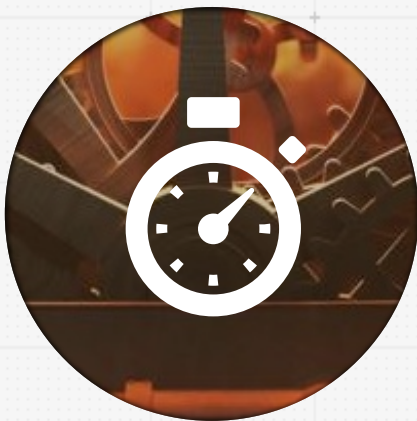

ADVANTAGES
how do we work

EVALUATION

Evaluation is done using the statistical data from previous projects.

TESTING

All of the code is covered by unit tests and tested manually

TRANSPARENCY

Clients have access to time tracking data and development server

FLEXIBILITY

2 different work plans

RECENT PROJECTS

OLIVIA

Financial Operations Automation Platform

VIVAHIBA

Creating Citizen Journalism Website from Scratch

WELLCASTER

wellness programs platform

How to Develop a Web Based Employee Scheduling Software?

26.10.2016

Once we were working on an interesting project, and one of the many features there was scheduling for companies with a large number of staff. In this article I would like to tell you when and how to develop a web based employee scheduling software.
